WORK HISTORY

Cyber Applications Team, Platform One, DoD DevSecOps, 06/2021 to 12/2021.

I received a competitive residency to work on a 6-man CAT team for DoD cyber security operations. This involved work with SD Elements, SonarQube, TruffleHog, BurpeSuite, and Fortify.

Developer,

I received a \$10,000 developer grant from the Akash Network to develop and deploy projects on their open-source cloud. Notable websites include *The Conceptualist Journal*, *ReddCoin*, and *NeuroOne Medical Technologies*. I received two awards from TezosCommons for my work onboarding users to the Tezos ecosystem and was one of 20 developers selected to test Indigitus' open-source router for servicing a decentralized VPN.

Link 16 Unit Manager, United States Marine Corps, 05/2019 to Present,

At VMU-2 I built and managed Link 16 networks. I also worked on designs to integrate the BATS/D platform into the RQ-21A.

US Naval Reserves, 08/2016 to 05/2019
